**Sheer Descent  
Waterfalls**

## Sheer Descent® Waterfalls

Sheer Descent waterfalls produce a clear arc of water, projecting away from the pool wall. The flow can be adjusted to create a range of effects from an almost silent, glass like sheet of water to a rushing mountain spring waterfall. Sheer Descent Waterfalls are available in a variety of lengths with a choice of white, light gray or clear lip colors.

- Creates a clear sheet of water that descends gracefully to the pool surface
- PVC construction
- X-Baffle™ construction

## Sheer Descent 6" Extended Lip Waterfalls

6" extended lip waterfalls produce the same effect as the standard 1" lip Sheer Descent Waterfall, but allow for installation of brick or stone on the face of the raised beam. The white, Light Gray and clear lip color waterfalls are easily cut in the field for custom radius curves. When extreme radius curves are required, a Super Radius Waterfall must be special ordered from the factory. See the radius cut guidelines for complete details.

**Sheer FiberFall**

## FiberFall®

Lighted waterfalls that produce powerful sheets of water. Single units available.

Part No.	Description	List Price
<b>1" Standard Lip Fiberfall - Back Feed</b>		
FFWS24L	24" Installed with 15' of AD9 Cable	\$978.24
FFWS36L	36" Installed with (2) 15' of AD12 Cable	\$1,662.78
FFWS48L	48" Installed with (2) 15' of AD12 Cable	\$1,887.11

<b>6" Standard Lip Fiberfall - Back Feed</b>		
FFWS24L-6	24" Installed with 15' of AD9 Cable	\$1,151.69
FFWS36L-6	36" Installed with (2) 15' of AD12 Cable	\$1,836.23
FFWS48L-6	48" Installed with (2) 15' of AD12 Cable	\$2,060.56

Zodiac does not recommend fiber longer than 15' from the light driver.

- **Fall cannot be cut in the field.**
- **Radius must be factory cut.**
- **Top of the fall and the acrylic lip, should never be exposed.**

\*(150 Strand Equivalent) Fiber Optic Cable (AD9)

\*\* (225 Strand Equivalent) Fiber Optic Cable (AD12)

**Sheer Curtain Waterfall**

## Sheer Curtain™ Waterfalls

Sheer Curtain Waterfalls produce a clear curtain of water that descends straight down from the unit. It is ideal for cantilever and swim-out installations. Note: If this product is installed on a wall, the wall will be saturated by water.

Part No.	Size	Description	List Price
<b>6" Extended Lip Sheer Curtain Waterfall - Back Feed</b>

1404CSC	4'	Sheer Curtain, Clear Lip	\$842.23

**Sheer Rain Waterfall**

## Sheer Rain™ Waterfalls

Sheer Rain Waterfalls provide streams of water and project them away from the lip of the waterfall at a 45° angle. The “rain” effect creates a unique waterfall sight and sound. Water requirement for this product is eight (8) U.S. gallons per minute per foot (gpm/ft). The more water provided to the waterfall, the farther out from the wall the “rain” projects.

Part No.	Size	Description	List Price

**Sheer Arc Waterfall**

## Sheer Arc™ Waterfalls

Sheer Arc Waterfalls can be positioned just above the waterline—no raised bond beam is required—making it perfect for vinyl liner pools. The fall projects up from the unit at a 45° angle and then naturally arcs and descends to the pool surface. Sheer Arc Waterfalls require double the water flow of a standard Sheer Descent® waterfall. They require 20–30 gallons per minute per linear foot. Sheer Arc Waterfalls are available with clear lips only.

Part No.	Size	Description	List Price
<b>6" Extended Lip Sheer Arc Waterfall - Back Feed</b>			
1201CSA	1'	Sheer Arc, Clear Lip	\$373.77

12"	60"	5 PSI	16 gpm	23 gpm	30 gpm	45 gpm	60 gpm

## SHEER DESCENT® ORDERING INSTRUCTIONS

When ordering Sheer Descent Waterfalls, please indicate style, lip color, feed type and lip size. If ordering a Super Radius cut, please indicate whether the cut should be convex or concave and specify the dimension of the radius.

### Select the following when ordering Sheer Descent Waterfalls:

- Waterfall Style—Sheer Descent, Sheer Curtain™, Sheer Rain™, Sheer Arc™, Rain Arc™
- Lip Color—White, Light Gray and Clear
- Length—1', 18", 2', 3', 4', 5', 6', 7', 8'
- Dimensions—3" Tall, 2½" Deep, 1" Lip
- Feed Type—Back Feed or Bottom Feed
- Lip Size—Standard (1"), Extended (6"), or Super (12")
- Super Radius—Convex or Concave
- 7–10 ft. head loss created. If more water is pushed, more head loss is created.

All Waterfalls take 5–10 business days to ship

**Sheer Descent**

**Sheer Curtain**

**Sheer Rain**

**Sheer Arc**

**Rain Arc**

## Waterfall Height Specification

Waterfalls naturally narrow as they fall. Waterfalls should not be installed more than 3½ feet above the water surface or the sheet will start to break up.

### Water Flow Requirement Chart

Guideline is for 1 ft. to 4 ft. models

### Hydraulic Guideline Chart

Suction (SUC) and Discharge (DIS) Water Flow Chart for PVC		
Pipe Size	Max SUC Flow*	Max DIS Flow**
1½"	37 GPM	50 GPM
2"	62 GPM	82 GPM
2½"	88 GPM	117 GPM
3"	136 GPM	180 GPM
4"	234 GPM	313 GPM

\*Based on 6' per second velocity. \*\*Based on 8' per second velocity.

Use Zodiac Water Feature Pump

Part No.	Description	GPM
<b>Max (Up) Rated Pumps</b>		
WFTR80	Water Feature Medium Head Pump, 230/115 VAC	80 GPM
WFTR120	Water Feature Medium Head Pump, 230/115 VAC	120 GPM
WFTR160	Water Feature Medium Head Pump, 230/115 VAC	160 GPM

### Pump Sizing and Installation Options

One of the advantages of the Sheer Descent Waterfall is the ability to provide a continuous sheet of water with a minimum of water flow. A standard 4 ft. model, for example, requires only 48 gallons per minute to operate. In order to size your pump properly, refer to the Water Flow Requirement Chart. In most cases, a properly sized standard swimming pool pump will operate the Sheer Descent Waterfall and filter the pool with little loss of total water turnover. As a general rule, the Sheer Descent Waterfall requires approximately 12 gallons per minute per foot with little head loss. For a more dramatic effect, more water gallonage can be applied to project the waterfall further away from the wall.

NOTE: When plumbing multiple falls, add the total length of waterfalls together to determine GPM required. Example: when plumbing two 6' units, you now have 12 feet of waterfall, which requires 144 gallons per minute.

The installation of the Sheer Descent® Waterfall using the main pool filter pump is the most common plumbing system due to the unique low flow aspect of the waterfall system. Simply plumb a 3-way valve on the return line, after the filter, and plumb the waterfall feed line in a minimum of 1½" PVC schedule 40 pipe. Units above 5' in length need a minimum of 2" plumbing.

If multiple waterfalls are being installed, or a Sheer Descent Waterfall 6' or longer is being installed, we recommend installing a separate pump. When plumbing a pump dedicated for use by the Sheer Decent, a separate suction line to the pool must be plumbed. This should be plumbed in a minimum of 2" schedule 40 pipe.

Install at least two (anti-entrapment) suction outlets provided with covers which are listed/certified as complying with ANSI/ASME A112.19.8–2007. Suction outlets (drains) should be installed in accordance with ANSI/APSP–7, the American National Standard for Suction Entrapment Avoidance in Swimming Pools, Wadding Pools, Spas, Hot Tubs, and Catch Basins. The anti-entrapment suction cover is recommended to be positioned 18" above the floor of the pool.

Next, a Sheer Descent filter/strainer (part# 3456), or equivalent, must be installed on the return side of the pump, between the pump and the Sheer Descent Waterfall. A FILTER IS REQUIRED for separate pump installation, as debris (hair and lint) must not be allowed to enter the Sheer Descent unit. For installations requiring up to 60 gallons per minute, use one Sheer Descent filter. For higher water requirements, use two or more filters plumbed in parallel. A separate return line, with a 3-way valve plumbed in such a way that water can be balanced between the Sheer Descent Waterfall and return back to the pool, is also required. See plumbing diagram below.

**ALL Zodiac Water Features (Sheer Descent, Laminar Jets, and Aqua Accents®) MUST HAVE FILTERED WATER.**

## Sheer Descent® Waterfall Radius Cut Guidelines

Extended lip Sheer Descent Waterfalls can be custom cut in the field to meet specific needs such as curves, irregular shapes, etc. In order to custom fit the waterfall, carefully measure the amount of extended lip to be removed. Remember to leave enough room for tile and thin set, so the deepest edge of the radius cut will not be recessed from the tile line. NOTE: Never remove more than 4½" of the extended lip, leaving a minimum of 1½" of lip. See figure 12. Remove the Lip Protector prior to cutting the waterfall. Remember to replace the Lip Protector after cutting the radius to protect the fall from construction debris. When designing custom curves for the Sheer Descent Extended Lip models, please refer to the Minimum Radius Guidelines Table below to select the correct Sheer Descent model. Super Radius models accommodate very tight radius curves and are available by special order.

### Table Key

Sheer Descent Model	Abbreviation	Customized Cut
Extended Lip	EL	Field Cut or Factory Cut
Super Radius	SR	Factory Cut Only

**PowerFalls Custom Falls**

## Zodiac Water Designs Custom Water Features

### PowerFalls Custom Falls

Customized waterfalls that produce powerful sheets of water. These waterfalls can be custom built to various lengths and shapes to match many design applications.

**Recommended Flow Rate: 12 GPM per foot**

**List Price**

Straight PowerFall	\$342.62 per Foot
Curved PowerFall	\$428.27 per Foot
Curved PowerFall w/ Deflector	\$478.27 per Foot
Custom PowerFall Crating	\$30.00 per Foot

(Use PowerFall Custom Fall Quote Form on page 221 for quote request)

Possible PowerFall Deflector options:

**RainFalls Custom Falls**

### PowerStreams and RainFalls Custom Falls

Customized waterfalls that produce streams of water. These water features can be custom built to various lengths and shapes to provide either streams or rain fall to match design criteria.

**Recommended Flow Rate: 8 GPM per foot**

**List Price**

Straight PowerStream/RainFall	\$363.32 per Foot
Curved PowerStream/RainFall w/ Profile	\$499.68 per Foot
Custom PowerStream/RainFall Crating	\$30.00 per Foot

X= <input type="checkbox"/> 1" <input type="checkbox"/> 6" <input type="checkbox"/> 12"	X= <input type="checkbox"/> 1" <input type="checkbox"/> 6" <input type="checkbox"/> 12"	X= <input type="checkbox"/> Y= <input type="checkbox"/> In.

Minimum "X" dimension must be at least 1-1/2"

Minimum "Y" dimension must be at least 2-7/8"

For Radius option, proceed to step 5.

(OPTIONAL)

5 . Radius Cuts:

Check ONE of these Radius styles:

Concave Radius       Convex Radius

- Upon completion of proper sizes, write radius here:

Ft.  In.

Was radius template sent to Zodiac?

Yes       No

Any customized waterfall over 8 feet in length is a multi-unit. Determined at the factory, each unit will have an X-Baffle and water inlets to ensure proper water flow.

Example (top view with back water inlets):

Multi-unit Straight

Multi-unit Radius

- Only front of waterfall is Radius cut; back of waterfall is not cut.
- For pricing or assistance with design on waterfalls over 8', call Zodiac Pool Systems, Inc. at 1-800-822-7933.

BUILDER TIPS

- Due to potential alignment issues, multi-unit waterfalls should be plumbed using installation guide.
- Valve each separate waterfall feed.
- Install an in-line filter for dedicated waterfall pump lines with all custom falls.
- Lip and Body must be properly supported.
- PowerFall installation must not exceed 3-1/2 feet above pool surface to ensure laminar sheet of water.

POOL BUILDER MUST SIGN:

Please check your specifications and the Zodiac confirmation carefully. This is a custom product that is created by the information you provide. Zodiac is not responsible for errors in measurements or alterations that occur in the pool design.

## Aqua Accents®

Aqua Accents are another water feature innovation from Zodiac. All pieces are made from a lightweight blended polymer and resist chipping, cracking and fading. Aqua Accents are available in a natural stone finish and three metal finishes. To create the metal finishes, genuine metal is molecularly bonded to the piece so it appears to be solid bronze, copper or silver nickel. Because actual metal is used, these finishes will acquire a beautiful patina over time.

## Laminar Jets with LED

Zodiac Laminar Jets with LED create spectacular backyard water entertainment with dazzling nighttime lighting effects. They produce clear or lighted arcs of water as they silently enter your pool or spa.

- Laminar Jets with LED come standard with a built-in 12V LED light module
- Laminar Jets interface easily with Aqualink® RS and PDA controllers to synchronize with Zodiac Watercolors™ LED Pool and Spa Lights
- Laminar Jets are also available with the unique Pour-A-Lid™ option, enabling easy coordination with your deck finish
- Laminar Jets are easily adjusted at the deck to create arcs of water up to 7 ft. high and can project 8 ft. into the pool. Flow can be adjusted with an innovative internal flow adjustment valve conveniently located inside the canister for easy adjustment and tuning

Pebble  
Included

## Deck Jets™

The Zodiac Deck Jets create shimmering arcs of water from the deck into the pool or spa. Polished bronze composite coverplates provide a rich finish to the installed jets. The Deck Jets can be installed in almost any combination, and since they can be adjusted 360°, the dazzling effects they create can be changed again and again to meet your customer's mood.

The Deck Jets are packed in a set of four and include a pressure plug along with the polished bronze composite deck coverplates. They are 2½ inches in diameter.

- Polished bronze composite coverplates provide an elegant finish
- Fully adjustable (up to 360°) swivel nozzles
- Packaged in a set of four. Includes pressure testing plug
