

UltraTemp[®]

High Performance Heat Pump

By Pentair Water Pool and Spa[®]

*Simply the most economical way
to heat your pool and spa*

Best in class performance and efficiency. Environmentally superior. More standard features than any other.

With today's record energy costs, there's never been a better time to invest in a heat pump. Compared to gas, oil or electric heaters, UltraTemp® heat pumps use just a fraction of the energy to generate the same amount of heat. In fact, just 20¢ worth of electricity produces \$1.00 worth of heat generated by other methods. That means more comfortable water temperatures and longer swimming seasons for you and your family.

UltraTemp has earned the Eco Select brand, indicating it is one of our "greenest" and most efficient equipment choices

COMPARING THE COST TO HEAT YOUR POOL AND SPA

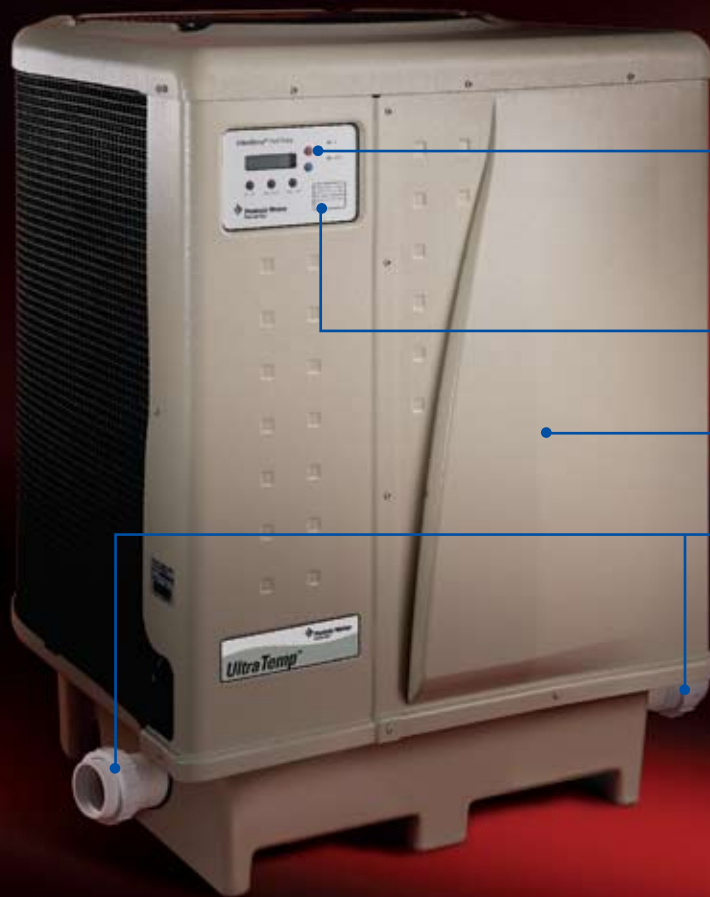

Heater/Fuel Type	Cost	BTU/\$1.00
Electric	\$.1065/kWh	32,000
LP Gas	\$1.87/Gal	40,100
Oil	\$2.22/Gal	47,200
Natural Gas	\$1.218/Therm	67,300
UltraTemp	\$.1065/kWh	185,600

This chart illustrates how an UltraTemp heat pump generates 2.75 to 5.8 times more heat for the same cost. Costs are based on national average fuel costs and efficiencies (Source: Federal Register). Please consult your local provider for current pricing.

Why should you choose UltraTemp? That's easy. It offers the longest list of standard features available.

- UltraTemp provides an AutoSet™ feature as standard. It monitors water temperature and turns the pump on and off as needed, overriding the time clock to maintain desired temperature. It's the ultimate in convenient, hands-free comfort control.
- UltraTemp features the legendary Emerson Copeland Scroll compressor that's more efficient, durable, reliable and quieter than any piston-driven compressor. It's the best of the best.
- UltraTemp is the only choice using EPA-recognized R-410A refrigerant, which is clean, environmentally safe, and doesn't deplete the ozone layer.
- 100% titanium heat exchanger assures corrosion-free performance for extra long life and value.
- LCD control board displays an intuitive, menu-driven readout with easy to follow, full word messages—no codes to memorize.

Digital controls with dual thermostats offer precise temperature control for pool/spa combinations and avoid overheating and energy waste

Self-diagnostic controls monitor and troubleshoot heat pump operations to ensure safe, dependable operation

Long-life, corrosion-resistant composite cabinet retains a like-new appearance for years

2" plumbing connections for easy installation

- Self-diagnostic software continuously monitors system for peak performance.
- Thermostatic Expansion Valve (TXV) controls refrigerant flow for optimum efficiency and BTU output over a wider operating temperature range.
- Automatic defrost feature senses refrigerant temperature and prevents UltraTemp from freezing, allowing the unit to operate effectively at even lower temperatures than many competing products.
- Perfect companion to IntelliTouch® control systems—all heat pump instructions and displays can be transferred to a centralized control system that manages all your pool/spa operations and poolscape features.
- ETL listing is your assurance of safe, dependable operation.
- BTU and efficiency independently certified by the Air-Conditioning, Heating, and Refrigeration Institute, AHRI. The AHRI Certified™ mark is applied only to HVACR equipment and components that have been independently tested to certify manufacturers' performance claims are accurate.

- 10-year compressor parts and labor warranty and lifetime warranty on the titanium heat exchanger. See limited warranty for details.

Clearly, a heat pump is the best choice for pool heating. Also clear is the best-in-class performance and value of the fully-featured UltraTemp. Contact your pool professional today to learn which model is right for your pool.

Automatic Heating/Cooling Feature!

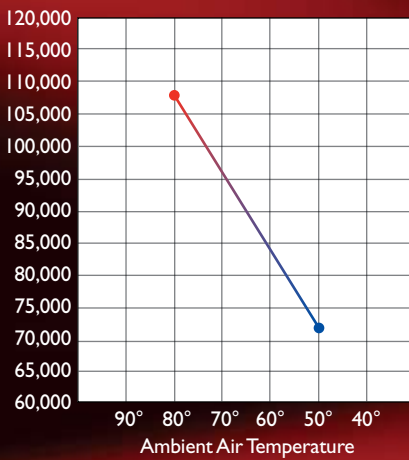

Pentair heat pumps automatically heat or cool your pool water based on temperatures you set. Select the AUTO mode and the intelligent thermostat will automatically command the heat pump to heat or cool the water to your selected temperature.

NOTE: Pentair Water Pool and Spa is a member of the Air Conditioning and Refrigeration Institute (ARI).
